

Dirt Motel 2 shown in Stargazing fly mode. Roll up the fly, affix with provided clips and enjoy the stars!

## Dirt Motel 2, 3 & 4

In order to familiarize yourself with your new tent, we recommend you "test pitch" before your first adventure. For additional information please visit [www.kelty.com](http://www.kelty.com).

Package includes: Shark Mouth carry bag, tent body, tent fly, one hubbed main pole set, one ridge pole, guy cords, and tent stakes. Footprint and other accessories sold separately.

1

Lay out tent body and stake out corners. Assemble hubbed main pole and lay on top of tent. Please note color coding on pole segments & tent body corners for correct pole set and tent body orientation. Please note, center hub connection nob that connects to tent body center clip should face down. PRO TIP: Do not shake out poles during assembly, take care of your gear and it will take care of you!

2

Insert pole tips into the Lightweight connector foot at back corners, flex pole to stand up and insert pole tips into front corner connectors.

Lightweight Foot connector.

Ridge pole with Ball Cap connector.

Guy out hook & loop pole wrap.

3

Start with the center clip, gently lift tent body up and connect to center hub on the pole. Then follow each pole and connect all pole clips. Locate ridge pole. Attach one end of ridge pole to Ball Cap connector above door zipper, lay pole across tent and attach opposite end to Ball Cap connector.

4

Drape tent fly over tent body, note matching colored PP-cord on tent fly coners & tent body corners for correct orientation. Attach all guy out hook & loop pole warps on underside of fly to poles. Locate & connect the 2 plastic D-rings (inside rainfly) to the Ball cap connectors above each door vent. Each corner of the rain fly has a PP-cord tied in a small fixed loop with a tension adjuster. Wrap each fixed loop around the tip of each pole (under each lightweight foot connector). Repeat this step for the other 3 corners, then gently tighten all tension adjusters equally.

5

Affix all guylines to guy out points on rain fly. Stake out all guylines and tension as needed.

Thank you for your business! If you have any questions please visit [www.kelty.com](http://www.kelty.com) or contact customer service.
