

# SUNSHADE

Sunshade with side wall

In order to familiarize yourself with your new shelter, we recommend you "test pitch" before your first camping trip. For additional information about Kelty products please visit [Kelty.com](http://Kelty.com).

Package includes: Sunshade body, removable side wall, three fiberglass poles, backpack carry bag, guylines, and tent stakes.

1

Lay out Sunshade and assemble all three poles. Be sure each pole section is fit securely into the connector of the next pole.

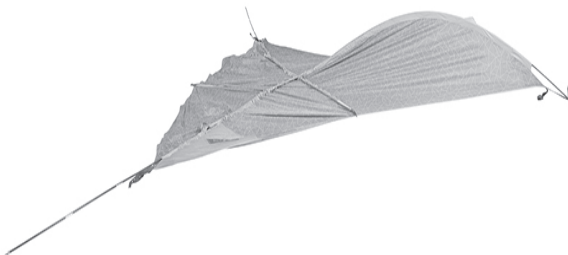

Pro Tip: Do not shake poles out during assembly, take care of your gear and it will take care of you!

2

Slide poles into pole sleeves with round capped end going first. Notice the cross over order of the pole sleeves at the center. For easiest set up, start with the pole/sleeve on the bottom of the pole intersection.

3

Be sure each pole is fully inserted to the pole sleeve. One by one, flex the pole stand up, and insert the pole tip into the grommet on the stake loop webbing.

4

guyout and guyline storage pocket

Stake all three corners. Remove guy line cord from the storage pockets midway up each pole sleeve. Stake the guy line at approximately 45 deg angle from Sunshade.
